

When i am in an area that I cannot receive the digital signal due to obstruction of signal,
I should be able to receive network broadcasts in HD via DIRECTV. This is not allowed
due to the fact that the OLD laws that are in place protecting local stations are still in
place. This needs to be stopped. Those laws in essence are censorship at work.
I
cannot watch a television station in California due to these laws. I cannot watch CBS
HDTV broadcasts because of these laws. This must be changed.
